Avenida Felipe Salomão

Nova Iguaçu, Rio de Janeiro

Summary

23 years old, passionate about technology and people. I study Java and technologies in general since 2012 until I was 13 years old. Ex-member of the Marine Corps.

Skills

Advanced English, Java, Spring, Spring boot, Microservices, JavaScript, PHP, HTML, CSS, Shell Script, Microsoft Access, Microsoft Windows Server, Oracle DB, Cisco Routers, Linux, Web Services, Testing, SQL, NoSQL

Experience

• Rio de Janeiro, State of Rio de Janeiro

01/2019 - 03/2022

(CTIC) Centro de Tecnologia da Informação e Comunicação do Ministério da Defesa located in (ESG) Escola Superior de Guerra, Urca - RJ.

- I worked helping to develop management, planning, communication and network management software. Using Java + Spring boot, PHP, JS, HTML, a little CSS, Shell Script and other technologies.
 - I worked together with my team for a longer time solving demands on our servers linked with MB, EB, FAB (Armed forces). Being to configure VLANs due to events, meetings, network security, traffic control and management of the military, ESG trainees, Commanders, Ministers and President in conducts, courses and training.
 - I configured servers, switches, proxies, wifi antennas, used CISCO systems to make connections and maintain full control.
 - I installed and configured backup management systems like Bacula systems and also helped in the development of a similar system for a specific role in our network.
 - I helped in the implementation of Zimbra e-mail. [here](#)
 - I also suggested the improvement of the old system of registration of the military in the network, developing my application in JAVA to make the direct registration in the DHCP Server in a safe and automated way.
-

Education

Analysis and systems development

Estácio de Sá University • Queimados, State of Rio de Janeiro

12/2019

In addition to certificates obtained by Udemy, I also obtained some certifications in Estratégia, Gran Cursos, English courses and a letter of recommendation regarding my good services, signed by Rear Admiral Cassiano Marques, Director General of Campus ESG (2021-2022); among other authorities. I received some face-to-face training from Cisco and public bodies in participating in technology courses. (If you want, I will be very happy to personally share my certificates)

I am currently studying Modern Application Development with Java on AWS from Amazon at Coursera.

Personal projects: studying and structuring my first Blockchain in Java (Currently developing the transaction and wallet processes).
